

Streamcore Training

STM - STI - STE

STM	: Installation & Operation training,	5 days
STI	: Installation training,	3 days
STE	: Operations training,	3 days

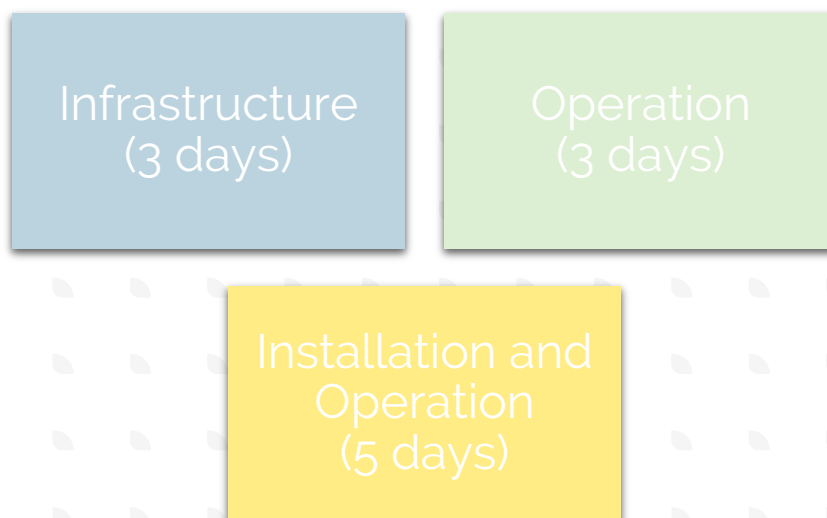

This training provides the necessary components for the implementation and operation of the Streamcore solution. At the end of the session, students will be able to deploy, install and configure the Streamcore solution. Candidates will also be able to understand the indicators reported by the solution, use the solution for troubleshooting or auditing purposes, and configure reports or dashboards. The training is complemented by numerous workshops to facilitate the understanding of the course.

Target Audience:

Engineers or technicians with general knowledge of LAN and WAN operation

Prerequisite:

Knowledge and experience with networks are essential.

Standard Streamcore Training Curriculum

Training content (ITS: +; STE: o; STM: + and o)

- + Identification of the Streamcore product line and its sizing
- + MMS IP cabling and configuration
- + Upgrade of MMS versions
- + IP configuration of Streamcore devices
- + Deployment of SG equipment in different architectures:
- + Redundant access, Active/Passive, Redundant access Active/Active ...
- + Understanding how the Streamcore tree works:
- + Creation of sites and rules and declaration of all client applications

- o Use of auditing and troubleshooting tools such as: in-progress connections or traffic discovery
- o Analysis of all the indicators reported by the solution, and understanding of their meaning.
- o Operation of the QoS and exploitation of the results.
- o Activation of the acceleration
- o Operation of the report generation tool. Understanding of the synthesis and dataming capabilities offered by this tool.
- o Use of alarms and visualization on StreamMap.

These trainings can be carried out :

Either in your premises and with equipment made available to Streamcore. A pre-installation of our products will be necessary

Either in Streamcore's premises with dedicated rooms specially equipped to receive your company's participants.

Streamcore's advantages:

- Experience:** Several hundred people trained since 2005.
- Innovation:** Fun tools for complex knowledge.
- Pragmatism:** The trainers are Consultants who implement the methodologies in the field.
- Applicability:** Beyond theory, we impart best practices.
- Customization:** Training adapted to your needs to make it

Teaching aids:

- o Alternating theory and practical cases.
- o Full-color course material in paper format.
- o Online assessment and certification.
- o One part in class (1 day)
- o A remote part (2 days)
